

Lab N₂ pressure meter **LAB.N2**

The newest ACM technology is the **patented** lab and at-line meter LAB.N2.

LAB.N2 determines non-destructively and precisely the container pressure of bottled still beverages with dosed N₂ in PET and glass, like juices, waters and still wines. Longterm tests on the same sample are now possible. Also measurements on PET containers closed with sports caps are enabled.

Disposal of sample - common with invasive manometer methods - is economized.

New

Advantages

- No moving parts, maintenance-free
- Extremely fast, easy handling
- Loss-free sample treatment!

Sample loss-free and precise pressure determination now also for bottlers of non-sparkling beverages!

Technical specifications

Measuring range	0-3,5 bar
Accuracy	+/- 0,05 bar
Repeatability	+/- 0,02 bar
Measuring result	within 1 minute
Data interface	to ACM QUATROL
